December 10, 2024

Dear Hiring Team,

I am excited to apply for the Software Development Internship at Nokia. As a current master's student in Computer Science and Engineering at the University at Buffalo, I am eager to bring my programming expertise and passion for innovation to Nokia's Network Infrastructure team, contributing to the revolutionary advancements in telecom networks.

My technical foundation includes extensive experience with C++ and Python, honed through academic coursework and projects involving software architecture and development. At Colgate-Palmolive, I collaborated with a team of developers to build scalable applications using Kubernetes and Django, improving system efficiency and delivering robust solutions. My proficiency in object-oriented programming and system design aligns with the requirements for this role, enabling me to write high-quality code and effectively analyze functional specifications.

What excites me most about this opportunity is the chance to work on cutting-edge telecom solutions that have a global impact. Nokia's commitment to innovation and inclusivity resonates deeply with me, and I am inspired by your recognition as one of the World's Most Ethical Companies. I am particularly eager to engage in activities such as designing software architecture, contributing to system integration, and testing solutions that enhance connectivity worldwide.

I look forward to the possibility of contributing to Nokia's mission of creating technology that helps the world act together. Thank you for considering my application. I would welcome the opportunity to discuss how my skills and experiences align with the needs of your team.

Sincerely,

**Pratik Fandade**
