Dear Hiring Team,

I am excited to apply for the Software Engineer Intern position at Glean. Your mission to transform workplace efficiency through AI-driven solutions deeply resonates with my passion for building impactful technologies that enhance productivity.

As a Computer Science graduate student with experience in backend development, infrastructure, and machine learning, I have developed scalable systems and contributed to optimizing software for real-world applications. During my tenure at Colgate-Palmolive, I collaborated on cloud-native projects leveraging Kubernetes, RabbitMQ, and React.js, successfully delivering solutions that enhanced system efficiency and user experience. These experiences have honed my ability to thrive in fast-paced, data-driven environments, which aligns well with Glean's innovative culture.

Glean's vision of integrating AI and enterprise knowledge excites me, and I am particularly drawn to the opportunity to work on challenges related to backend infrastructure or ML/NLP/Search. I am eager to contribute to your mission while continuing to grow alongside a world-class team.

Thank you for considering my application. I look forward to the possibility of contributing to Glean's groundbreaking efforts and would be delighted to discuss how my skills align with your goals. Sincerely,

**Pratik Fandade**
