To
Hiring Team,
AutoZone

December 7, 2024

Dear Hiring Team,

I am excited about the AutoZone Summer Internship opportunity in Information Technology for Summer 2025. With my background in Computer Science and Engineering, coupled with hands-on experience in Python, Java, and C++ development, I am eager to contribute to AutoZone's technical systems while learning from your experienced teams. My familiarity with tools like GitHub, GitLab, and Jira aligns well with the collaboration and project management expectations for this role.

The chance to manage sprints, engage in cross-functional shadowing, and receive 1-on-1 mentorship makes this internship a perfect fit for my career goals. I look forward to gaining practical insights into application development, information security, and infrastructure operations, as well as contributing meaningfully to AutoZone's projects.

I am particularly drawn to AutoZone's commitment to fostering professional growth through workshops, networking events, and a structured program that offers a realistic preview of IT careers. The prospect of joining a team that values innovation, collaboration, and development is incredibly motivating. Sincerely,

Pratik Fandade
