Austin, TX*

September 24, 2024

Dear Hiring Manager,

I am writing to express my interest in the Data Scientist Summer Internship at Wayfair. As a current Master's student in Computer Science and Engineering at the University at Buffalo, I have developed strong analytical and programming skills through coursework and projects that align closely with the responsibilities of this role. My hands-on experience with Python, SQL, and cloud technologies like Google Cloud aligns with Wayfair's data-driven and collaborative approach to solving complex business challenges.

In my previous role as a Senior Technology Associate at Colgate Palmolive, I worked alongside a global team of developers to build and maintain software solutions that processed large datasets. I contributed to optimizing APIs, improving system performance, and analyzing business data to generate actionable insights. This experience enhanced my technical and problem-solving abilities, equipping me to thrive in the fast-paced and collaborative environment at Wayfair.

I am particularly excited about the opportunity to leverage Wayfair's multi-terabyte datasets and collaborate with Product Management, Software Engineering, and Product Design teams to drive data-driven decisions. I am eager to apply my technical skills in a dynamic setting where my contributions will have an immediate impact.

Thank you for considering my application. I am excited about the prospect of joining Wayfair and contributing to your innovative data science initiatives. I look forward to the opportunity to further discuss how I can add value to your team.

Sincerely,

Pratik Fandade
