Dear Hiring Team at RightOn Education,

I am excited to apply for the Software Engineer role at RightOn Education. With a strong background in software development, a passion for building impactful technology, and a deep appreciation for education, I am eager to contribute to your mission of empowering students through STEM learning.

My experience in Python, React, and Django, along with cloud platforms like AWS and GCP, has enabled me to develop scalable and efficient software solutions. Recently, I collaborated on a project integrating AI-driven personalized learning tools, leveraging machine learning to enhance student engagement. This aligns with RightOn Education's vision of using technology to advance math and STEM education.

Beyond technical expertise, I thrive in fast-paced, collaborative environments, having worked in cross-functional teams to build and deploy full-stack applications. I am particularly drawn to this role because it offers the opportunity to develop impactful educational software that enhances learning experiences for students globally.

I am confident that my problem-solving skills, software development experience, and passion for education technology would make me a valuable addition to your team. I have attached my resume and a code snippet showcasing my skills, and I would love the opportunity to discuss how I can contribute to RightOn Education's mission.

Looking forward to hearing from you!

Sincerely,

**Pratik Fandade**
