*Hiring Committee,
Oracle Corporation*

November 22, 2024

Dear Hiring Committee,

I am writing to express my strong interest in the Software Engineer Intern position within Oracle Cloud Infrastructure (OCI). With a robust foundation in full-stack development and distributed systems, I am eager to contribute to OCI's mission of delivering state-of-the-art elastic cloud services that empower businesses to tackle the world's most complex challenges.

In my role as a Senior Technology Associate at Colgate-Palmolive, I have gained hands-on experience in building scalable APIs, implementing microservices architecture, and optimizing systems for high performance using tools like Kubernetes and RabbitMQ. My technical expertise spans languages and frameworks such as React, Python, and Node.js, and I have worked extensively with cloud platforms to deploy distributed solutions. These experiences have not only honed my technical acumen but also reinforced the value of collaboration and delivering solutions that scale efficiently.

I am particularly excited about the prospect of joining Oracle's Virtual Networking team. My background in networking protocols, databases, and distributed systems directly aligns with your focus on building innovative cloud infrastructure solutions. I am confident that my ability to design systems that prioritize simplicity, reliability, and performance would make me a strong fit for this role.

In addition to my technical skills, I bring excellent communication abilities and a passion for continuous learning. Whether it's debugging complex issues or collaborating with cross-functional teams, I thrive in dynamic environments and am committed to delivering results that align with organizational goals.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and experiences align with the needs of the team at Oracle.

Sincerely,

Pratik Fandade
