To
Hiring Team,
Arthrex

Dear Hiring Team,

I am excited to apply for the Software Quality Engineering Intern position at Arthrex's Santa Barbara facility for Summer 2025. As a master's student in Computer Science and Engineering at the University at Buffalo, I bring a strong technical foundation and hands-on experience in testing, automation, and quality assurance.

During my tenure at Colgate-Palmolive as a Senior Technology Associate, I collaborated with developers to enhance software quality by identifying and resolving over 100 critical bugs and implementing automated testing frameworks. These efforts streamlined processes, reduced performance overhead by 30

Arthrex's commitment to advancing medical technology aligns with my passion for impactful innovation. I am eager to contribute to your software quality engineering team by developing robust automated test cases, ensuring precision in manual testing, and enhancing your automation frameworks.

Thank you for considering my application. I am enthusiastic about the opportunity to support Arthrex's mission of improving patient outcomes through advanced technology.

Sincerely,

Pratik Fandade
